EDUCATION

University of Maryland - College Park **August 2021 – May 2025**
Bachelor of Science in Computer Science *College Park, MD*
GPA: 3.6; Carillon Communities, Dean's List

SKILLS

Programming Languages: Python, Java, JavaScript, HTML, CSS, SQL, C#, R

Hard Skills: SAP EWM, SAP TM, SAP S/4HANA, Microsoft Office 365, Google Workspace, Adobe Creative Cloud

Soft Skills: Agile Methodologies, Cross-Functional Teamwork, Philanthropy, Budgeting

EXPERIENCE

Technology Consultant **November 2025 - Present**
EY *New York, NY*
- Developed a semi-automated tool using TypeScript to indicate urgency-ranked material shortages and requirements
- Resolved qRFC errors to maintain integration between SAP Extended Warehouse Management (EWM) and S/4HANA.
- Designed dashboards and SAP EWM Warehouse Monitor variants to deliver key operational metrics for executive leadership
- Worked alongside development teams to reproduce defects, validate bug fixes, and test new functionality.
- Presented new functionality to client leadership through technical demonstrations, design reviews, and feedback sessions.

Software Engineer Intern **June 2024 - August 2024**
MarketAxess *New York, NY*
- Implemented RESTful API endpoints to fetch/send data through a topic/parameter-specific RPC using Sonic
- Integrated SQL stored procedures to join, retrieve, and display essential information using AG-Grid
- Collaborated with cross-functional teams to deliver product proposals capable of generating $20M+ in revenue

Data Engineer Intern **June 2023 - August 2023**
Cyber 2.0 *Tel Aviv, Israel*
- Designed an application to compress specific data fields from SQL tables at varying intervals using threads in Python
- Engineered a script to merge a conditional number of databases, avoiding duplicates, using C# and SQL
- Enhanced prompt engineering skills by engaging in a range of assigned tasks

Computer Technician Intern **January 2023**
Titan Technologies *Freehold, NJ*
- Assisted clients with software and hardware requests using RMM software and KVM switches respectively
- Initiated the switch to an updated server system for a client by upgrading hardware and eliminating unnecessary data
- Communicated with Senior Technicians to execute assigned tasks to the highest degree

PROJECTS

Law Firm Billing Software | *JavaScript (React.js), HTML, CSS, Firebase, Cursor*
- Built a multi-tenant law firm billing web application that tracks clients, billable work, retainers, invoices, and payments
- Designed charts that compare financial data over time, with year-to-date totals and multiple filter options
- Restricted data sharing and user access through database security rules, single-use invite codes, and role-based access

Prediction Algorithm for NFL's Super Bowl Winner | *R, Excel*
- Analyzed over 20,000 cells of data involving multiple statistics over 20+ years provided by reliable NFL statistic databases
- Developed an algorithm to predict which NFL teams are most likely to win the Super Bowl based on the statistics found
- Parsed statistics and used ggplots to visualize data and draw conclusions through the prediction algorithm
