EDUCATION

University of Maryland - College Park

Bachelor of Science in Computer Science

GPA: 3.6; Carillon Communities, Dean's List

August 2021 – May 2025

College Park, MD

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript (React.js), HTML, CSS, SQL, C#, R

Hard Skills: SAP EWM, SAP TM, SAP S/4HANA, Microsoft Office 365, Google Workspace, Adobe Creative Cloud

Soft Skills: Agile Methodologies, Cross-Functional Teamwork, Philanthropy, Budgeting

EXPERIENCE

Technology Consultant

EY

November 2025 - Present

New York, NY

- Developed semi-automated tools using TypeScript, providing warehouse teams with visibility into urgency-ranked material shortages and constraints
- Designed reporting dashboards and SAP EWM Warehouse Monitor variants to deliver key operational metrics for executive leadership
- Monitored RFC queues and verified communication between SAP EWM and SAP S/4HANA, helping maintain reliable system integration
- Worked alongside development teams to reproduce defects, validate software fixes, and test new functionality before production deployment.
- Presented new SAP EWM functionality to client program leadership through technical demonstrations, design reviews and feedback sessions

Software Engineering Intern

MarketAxess

June 2024 - August 2024

New York, NY

- Implemented RESTful API endpoints to fetch/send data through a topic/parameter-specific RPC using Sonic
- Integrated SQL stored procedures to join, retrieve, and display essential information using AG-Grid
- Collaborated with cross-functional teams to deliver product proposals capable of generating \$20M+ in revenue

Data Engineering Intern

Cyber 2.0

June 2023 - August 2023

Tel Aviv, Israel

- Designed an application to compress specific data fields from SQL tables at varying intervals using threads in Python
- Engineered a script to merge a conditional number of databases, avoiding duplicates, using C# and SQL
- Enhanced prompt engineering skills by engaging in a range of assigned tasks

PROJECTS

Law Firm Billing Software | *JavaScript (React.js), HTML, CSS, Firebase, Cursor*

- Built a multi-tenant law firm billing web application that tracks clients, billable work, retainers, invoices, and payments
- Designed charts that compare financial data over time, with year-to-date totals and multiple filter options
- Restricted data sharing and user access through database security rules, single-use invite codes, and role-based access

Prediction Algorithm for NFL's Super Bowl Winner | *R, Excel*

- Analyzed over 20,000 cells of data involving multiple statistics over 20+ years provided by reliable NFL statistic databases
- Developed an algorithm to predict which NFL teams are most likely to win the Super Bowl based on the statistics found
- Parsed statistics and used ggplots to visualize data and draw conclusions through the prediction algorithm
